SHOWING NO. 3240 PATENT PUNCH KNIFE, PUNCHING LEATHER

PATENT PUNCH KNIVES

The Knives illustrated on the following pages have, in addition to the regular Cutting Blades, the New York Knife Co.'s "Patented Punch." This is the only Punch manufactured that will cut a round smooth hole up to ½ inch in diameter in any thickness of Leather, Rubber Belting or similar material, with perfect ease and precision. It is an invaluable tool for repairing Belting, for mending Harness, or making Buckle Holes. The curved upper face of the Punch extending slightly over the edge of the Knife makes it easy to open even if the user has on gloves. It is very strong and will hold its keen cutting edge a long time without resharpening. All Blades and Punches are made of the Highest Quality Crucible Tool Steel, and are perfect in temper and cutting qualities.

For complete description and lists, see pages 926 to 929, inclusive.
